

## Webinar

### Neighbourhoods across Europe with little or no parking

Europe is home to many examples of housing with little or no parking. Some of them are pioneers in their countries. From Malmö to Cologne, this webinar will afford an opportunity to discover these initiatives through the eyes of their designers.

What are the factors that led to the creation of such neighbourhoods? What innovative solutions were implemented? Now that they have been around for several years, how are these neighbourhoods faring? And what are the takeaways? These are the themes that will be addressed in the presentations and discussions that follow.

*The Webinar is in English.*

## When ?

Thursday **05.11.2020**
